CARBON, ALBERTA, THURSDAY, JUNE 26, 1930

\$2.00 A YEAR IN ADVANCE

FINANCIAL STATEMENT OF THE CARBON CHAUTAUQUA

The Chautauqua Committee gives hereunder a comparative of financial statements for 1929 and 1930. It will be noted that whereas in 1929 we had a surplus of \$257.58, this year owing to prevailing conditions, there was a deficit of \$240.25. While fortunately, owing to the fact that we had a surplus on hand from former years, the guarantors were not called upon to

make good the amount, it is hoped that future Chautauquas will receive better support from the people of the district, otherwise it will not be possible to bring this high class form of entertainment and instruction to Carbon.

BEST RAIN OF THE YEAR

The best rain that has visited the Carbon district this year commenced on Thursday evening of last week and did not let up until late Friday evening, more than a 24-hour rain resulting. This is just what the grain needed and we will now be assured of a crop in the Carbon district at least. The fields that were damaged by the wind of last week are showing up well now and wheat that was thought to be practically a total loss is coming along splendidly. It will only take one more good rain in about three weeks or months time to give Carbon a pretty good yield of wheat.

CLAYPOOL ELECTED AS GOVT. MEMBER

U. F. A. POLLED ONLY 38 PER CENT BALLOTS IN ELECTION

Wheras, during the recent provincial election an average of 1800 votes elected a member of the United Farmers of Alberta party, the average Liberal member who succeeded had to poll 4100 votes. Even more was demanded of Conservatives, for they required 4216 votes for each member elected. Labor was rather less taxed, getting in one member for every quota of 3400 votes polled, while Independents had a harder task than any of the known parties, requiring an average of over 9000 votes to elect each representative.

GOOD FLOW OF GAS STRUCK AT WELL

The drillers for the Carbon Exploration Company's first gas test well commenced drilling through the cement last Thursday and by Monday night the hole was over 500 feet down. Considerable gas has been struck at this depth and many of the shareholders were out to the well on Monday evening. The gas was ignited and flames were forced into the air to a height of about six feet. This is very encouraging and the directors have decided to have the well drilled to a depth of 700 feet to see if the gas flow will increase. So far the gas has increased with depth and it is believed that this will be the case as the drill goes further into the ground. A sample of this gas will be sent to Edmonton for analysis and it is hoped that it will contain oil matter.

The possibilities for oil here are said to be very great with this gas showing and it is expected that a drilling company can be interested in the proposition, and a real oil well put down in the supposed oil field.

Drilling was suspended for a day on Tuesday, but was commenced again Wednesday. So far the drillers have been working night and day and great progress has been made.

On Monday night pictures were taken of the gas flame so as to show outsiders just what Carbon has in the way of gas at 500 feet.

ROMANTIC THRILLS IN HOOT GIBSON'S LATEST PICTURE

The romance of old California provides a colorful and interesting background for "Burnning the Wind," Hoot Gibson's newest Universal Western, which is scheduled to make its first appearance at the Carbon Theatre on Friday and Saturday of this week. The picture is an adaption of William MacLeod Raine's widely-read novel, "A Daughter of the Dons." The full measure of romance, beauty and action which charmed and thrilled readers of the book has been transferred to the screen version. A section of California, still vibrant with the memories of the pioneer Spaniards, was used as a location spot and much of the film was made there.

"Burnning the Wind" established a new record in time spent on the filming of Western productions as more than six months were consumed during the making. Two directors, Henry MacRae and Herbert Blache, alternated at the megaphone.

The picture is reported to be one of the best of Gibson's productions. It is packed with thrills. The star appears at his best in daring riding and fighting feats.

Virginia Brown Faire plays the chief supporting role as Maria Valdes, the "daughter of the Dons." Others in the cast are Cesare Gravina, Robert Homans, Georges Grandee, Boris Karloff, and Pee wee Holmes.

IN LOVING MEMORY OF
WALTER BRAMLEY
Who died June 22nd, 1928
Oh for the touch of the loving hand
That used to be so dear.
It always for our cause did stand
And always was so near;
We miss it here, we miss it there,
We miss thee, father, everywhere.
—Inserted by his Wife and Children

With the final count in the Didsbury Constituency for the Provincial election, A. B. Claypool, U.F.A. was declared elected with a majority of 316 votes, the count being 1772 for Claypool and 1456 for Austin. The election was close in the Didsbury constituency, as the following will show by the vote from the towns in the riding:

Austin	Claypool
Acme	124
Carbon	168
Carstairs	198
Didsbury	242
Grainger	24

LITTLE ITEMS OF LOCAL INTEREST

The Ladies' Aid of the Carbon United Church will hold a strawberry social in the old Frico Store on Saturday, June 28th, from 3 p.m. to 12 p.m.

Mr. Edward Neher came out from California last Friday and is visiting with relatives in the district.

Born to Mr. and Mrs. Chris. Harsch on Wednesday, June 18, a son.

See the remarkable Bargains that C. H. Nash is advertising in this issue of The Chronicle.

J. A. MacDonald returned last Thursday from Ontario, where he has been attending the Shriner's convention. Mr. MacDonald took a trip through the Eastern United States before returning home.

J. W. Baird is having the Elks hall repainted.

A Tombstone Competition was held on the Golf Course on Sunday. Fourteen players entered under handicap and prizes of the competition were won by W. Edwards first and E. J. Rouleau second.

See the remarkable Bargains that C. H. Nash is advertising in this issue of The Chronicle.

The Grand Forks baseball team will play Carbon at the local baseball diamond tonight at 6:30 sharp.

We understand that the Cluny tennis club will visit Carbon on Sunday.

J. C. Spence commenced his holidays last Friday and left for his home in Suffield, Alta.

ED. BITZ MACHINE SHED BURNS; MACHINERY LOSS

The farm of Ed. Bitz near Grainger, was the scene of a fire on Sunday evening when the machine shed, containing gasoline, oil, machinery and a light delivery Ford truck, was burned to the ground. Fortunately the truck and some machinery was saved, although the loss with machinery is reported to be considerable.

The fire was started from gasoline. The owner with a lighted lantern, went to the machine shed, where he keeps a barrel of gasoline, with the intention of refilling the tank of his car. While in the act of filling a container the fumes were ignited from the flame of the lantern and before it was realized what had happened everything was in flames.

Besides the loss of machinery, two barrels of oil and two drums of gasoline went up in flame.

The reason some chorus men wear flowers in the coat lapel is because they can't wear them in their hair.

The Problem Of Markets

It may be poor consolation to the wheat producers of Western Canada, who are in a quandary over the problem of selling their product in the markets of the world at a price which will yield to them a reasonable profit over the cost of production, to learn that they are by no means the only producers of a commodity used throughout the world who find themselves in difficulty of a like kind. And because the producers of these primary commodities are experiencing difficulty in finding markets, the makers of secondary and manufactured articles are also feeling the pinch, and find themselves overstocked with goods which they cannot at the moment sell.

The situation which exists is not one that affects Canada alone, or any one commodity alone, but the whole world. It is a problem of over-production in the majority of cases. It affects not only the primary producers in all countries, and the manufacturers, but it reacts adversely upon every class of business and every individual. Because there is a glut of primary products the transportation companies are losing business, and in turn they are employing fewer men in their manifold departments. Merchants require less help because less goods are being sold, office staffs are reduced, and the resultant shortage of money and of buying power on the part of everybody has slowed up or put a temporary stop to building construction activities.

No country in the world is immune from this present condition. It is world wide, but, fortunately, Canada is less seriously affected than any other of the great trading countries of the world.

While Canada's problem is wheat, Brazil's is coffee. While other countries grow coffee, notably Java and Arabia, Brazil is the great source of supply. It has been steadily increasing production, as have other countries, growing more coffee than the world could consume. In order to prevent prices falling to a ruinous figure below actual cost, Brazilian Governments bought up the surplus and kept it off the market, to be released in years of a short crop. The result is Brazil now has sufficient coffee on hand to meet total world requirements for two years, with another big crop coming on. The financial strain has proven too great, and that country is now endeavoring to float a huge loan, \$100,000,000 or more, at a high rate of interest, and in doing so has given a pledge it will buy no more coffee, and will liquidate its present enormous holdings within ten years.

Sugar is in much the same position as coffee. In 1926-27 world production of sugar was placed at 23,750,000 tons, or about 300,000 tons less than consumption. The following year production exceeded consumption slightly, but in 1928-29 production jumped to over 27,000,000 tons, or far in excess of world requirements, while this year's estimates indicate a still greater production.

Cotton, too, joins the procession. In the last five years the United States produced on the average 40% more cotton than the average for the preceding ten years. The average for the ten-year period ending 1925, was about 11,000,000 bales; in 1926, about 18,000,000 bales were produced. Texas, formerly a great cattle ranching state, is now the greatest cotton producer among the states. Oklahoma is also going in strongly for cotton, and both states are using machinery, as against the old hand picking system, with a result similar to the revolution in wheat production through the introduction of the combine. One Texas farmer harvested 1,700 bales of cotton with five laborers, whereas under the system in the old cotton growing states 100 workers would have been required to plant and cultivate and 200 more to pick the crop by hand. It is estimated that Texas alone could produce twice as much cotton as present world needs.

Rubber, copper, tin, zinc, silk, and other basic commodities are all in the same class, production out-stripping consumption, the increase in the latter not nearly equaling the increase in the former, and in regard to some commodities, silver for example, actually declining.

Coupled with this situation was the huge withdrawal of money and credit into the speculative stock market during the past two years, ending in the crash of some months ago. The effect was that farmers were deprived of their usual credit facilities, and this reacted unfavorably upon their retail purchasing, which, in turn, reacted upon consumption, consumption on manufacturing, manufacturing on labor, and labor on consumption. All business slowed up.

In the case of Malay rubber, Cuba sugar, Brazil coffee, the idea prevalent was that control of distribution was the same as control of production. As one writer says, there could be no greater mistake. Production is controlled by the direction and energy of human activity aided or retarded by forces of nature. Prices are arrived at by the relationship between supply and demand. If demand is greater than supply prices rise. If supply is greater than demand they fall.

In Canada, the source of national prosperity, it is now admitted, lies in the wheat crops of the West. World wheat production is steadily, even rapidly, increasing. The biggest problem, therefore, confronting Canada today, is to find a profitable, permanent market for its wheat. To the solution of that problem every Government, the Wheat Pools, farmers' organizations, manufacturers, merchants, citizens generally, must bend their energies and to it devote their best, most constructive thought.

Reduce the Acid

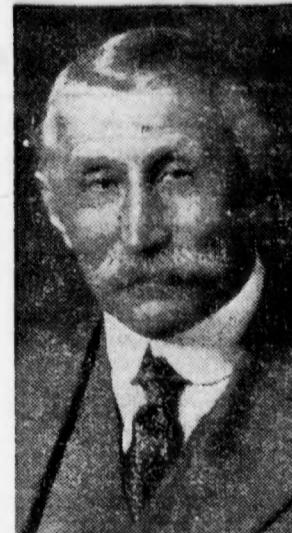

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

WAS WIDELY KNOWN

The Late F. E. Trautman

Death took a colorful figure from the railway and newspaper worlds of Canada recently, when F. E. Trautman, for many years press representative for the Canadian Pacific Railway, succumbed to short illness in Misericordia Hospital, Winnipeg. "F.E.", as he was familiarly known in hundreds of newspaper offices throughout Canada and the United States, was in his 67th year. He leaves a widow and one young daughter, June.

After a long and varied journalistic career in the eastern states, Chicago and Canada, in which he filled every position from one at the compositor's case to the editorial chair, Mr. Trautman joined the Canadian Pacific Railway in Winnipeg, in 1912, under Sir George Bury, who was then vice-president, and inaugurated the first railway press bureau here.

Under a deliberately gruff exterior, the veteran press representative carried a remarkable fellow feeling for the young newspapermen, and many contemporary figures of note in the fourth estate owe their start or their success to his advice and help. It is partly on this account that few Canadian journalists were so widely known and admired.

Mr. Trautman was married to Miss Kathryn M. Ross, who survives, and who was at the bedside during his last illness.

DO YOU VALUE YOUR HEALTH?

If your health is poor; if you are pale, nervous and easily tired; if you suffer from headaches and backaches; if your digestion is bad you may depend upon it that these symptoms come from an impoverished state of the blood. That unless this condition is remedied a complete breakdown may follow. Dr. Williams' Pink Pills are a perfect medicine for any one in this condition. They enrich and purify the blood and thus promote health and strength.

Mrs. G. M. Andrews, Halifax, N.S., writes:—"I always keep Dr. Williams' Pink Pills in the house. When I was a young, anaemic girl they completely restored my health. After marriage my health broke down and once more these pills brought me back to health. My friends all tell me how well I look and for this Dr. Williams' Pink Pills deserve all credit."

You can get these pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Everything Special

A special carpet in two shades of pink was woven for the June wedding of Miss Gasquet, heiress of the Woolworth millions. A gardener grew roses of the same shade as her dress, and a designer specially studied Miss Gasquet, in order to "absorb her personality," before designing her wedding dress.

Douglas' Egyptian Liniment is a quick, certain remedy for Hoof, Rot, or Thrush. Four or five applications are usually enough.

All Branches Represented

All branches of organized activity in the Province of Manitoba were represented at a meeting in Winnipeg, when plans for Manitoba's diamond jubilee celebration on July 15th were launched. The celebration will commemorate the 60th anniversary of the province's entry into confederation.

Minard's Drives Away the Headache.

W. N. U. 1843

Her Three Children Troubled With Diarrhoea

Mrs. Leo Lapointe, Laurier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Women Who Work

Modern Devices Have Not Altogether Eliminated Work In the Home

By some persons whose knowledge of housewives is limited those important members of society are supposed to have been relieved of the necessity of doing any physical work. Excessive feminine indulgence in amusements is assumed to be the sorry result.

Systematic inquiry shows a very different state of things. The Bureau of Home Economics in the Federal Department of Agriculture reports that in country districts and in cities of less than 50,000 population women work in their homes considerably over forty-two hours a week, while the average among thousands of women questioned is fifty-one hours a week.

Plainly, vacuum cleaners, electric washing machines, telephones, canned goods, delivery service and all the rest of the time saving and labor-saving devices have not reduced the housewife to demoralizing idleness. She is not yet threatened with ennui. There is no great danger of her finding too much leisure on her hands. Worry over her mental and moral condition in her supposed state of freedom from toil is, to say the least, premature.—Chicago News.

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable powers of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Solved His Problem

A visitor from Aberdeen at a Liverpool hotel inquired about the board charges. The figures being rather high, Sandy exclaimed: "How much do you charge for garaging my car?" No charge whatever, he was told. "Well, then," decided Sandy. "I will sleep in my car tonight."

The Philippines are to have a chain of hotels.

More Remaining In Canada

Scientifically Trained Men Not Leaving In Such Large Numbers

A radical decrease in the number of scientifically trained men who find it necessary to leave Canada for employment was cited by Rev. Dr. H. J. Cody, chairman of the board of governors of the University of Toronto, in an address to the Canadian Manufacturers' Association there. Dr. Cody spoke of the work of the Technical Service Council, an organization founded in 1927. During the past year, 1,000 applications for trained men had been received, and 550 graduates had been placed in key positions in Canada. Since 1925 the percentage of the graduating class of Toronto University leaving the country had been reduced from 27 to 3 percent.

Stop the Cough. — Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

British Stock For Canada

If this Empire is to remain a British Empire and its practice and its institutions are to remain British, the British stock must be increased to keep pace with other stock which is flowing into the vacant spaces. So far as Canada is concerned there are two ways of doing this—by assimilation and by the injection of new British stock. Both processes should be worked simultaneously.

Falling Hair

Use Minard's before it's too late. It checks falling hair and stimulates new growth as well. Apply persistently to scalp four times a week.

BALDWIN WILL NOT CONFER WITH PRIME MINISTER

London, England.—It is understood that Rt. Hon. Stanley Baldwin, Conservative leader, has declined to accept the invitation of Prime Minister Ramsay MacDonald to participate in a conference of the three party leaders on the emergency problem of unemployment.

Mr. Baldwin's reply was sent to the Prime Minister after consultation with leading Conservatives.

These advisers, it is said, took the view that Conservative abstention from the conference would not prevent the Government from introducing to the House of Commons any measures they might evolve to meet the critical situation. The Conservatives pointed out that these measures, should they win the support of the Rt. Hon. David Lloyd George and his Liberal followers, Mr. Lloyd George having pledged co-operation in any "sound and effective" legislation, would be passed by the House.

The Conservatives feel the present Government is incapable of dealing with unemployment and resent Mr. MacDonald's refusal to allow the opposition access to official data on the present condition of trade, industry and unemployment. With insufficient material to go upon, the Conservative chieftain submitted, the party could not promulgate any constructive action, as it would like to do, but must be merely a rubber-stamp for the Labor Government's plans.

Sir Austen Chamberlain opened the Conservative attack. He twitted Mr. Lloyd George for his recent "wooing" of Mr. MacDonald. "But the Prime Minister," Sir Austen added, "has been rather coy."

"The leader of the Liberal Party" Sir Austen exclaimed, "has shown a desire to share the power of the government without a readiness to accept the responsibility, while the Prime Minister wants to share the responsibility and still retain the power."

The Conservative speaker charged the government was barren of a policy regarding unemployment and barren of a policy on Empire trade. Yet the Dominions—the latest example came from Canada—had shown that in cases where they could not fill their own needs, they would rather buy from Britain than from the outside world.

Opening Campaign In B.C. On July Fourth

Premier King Will Hold First Meeting At Revelstoke

* Vancouver, B.C.—Senator J. H. King announced here that Prime Minister Mackenzie King will open his election campaign meetings in British Columbia on Friday, July 4, when he will speak at Revelstoke on his way to the Pacific coast. The prime minister will arrive in Vancouver on July 6, and proceed to Victoria where he will address the electorate on Monday evening, July 7. On July 8 he will speak in Vancouver, and on Wednesday, July 9, in Kamloops.

Chicago Gang Rule

Will Make Thorough Investigation Of Police Department

Chicago, Ill.—A thorough investigation of the Chicago police department and its failure to cope with the rule of gangsters was ordered by the city council at its first session since the assassination of Alfred "Jake" Lingle, Tribune reporter, nine days ago, to focus attention on crime.

Mayor William Hale Thompson announced that John H. Alcock, the "iron man" of the force, would remain at the helm of the police department indefinitely.

Exempt From Income Tax

London, England.—Consular employees and other official representatives of foreign governments in Great Britain will continue to be exempt from British income tax, according to a finance bill provision which passed the committee stage of the House of Commons recently.

W. N. U. 1843

Will Pay Portion Of Freight Rates

Government To Assist In Shipments Of Lignite Coal

Ottawa, Ont.—The Dominion government will pay 50 cents per ton of the freight rates on all Saskatchewan lignite coal shipped into Manitoba during the next year, according to an order-in-council made public by Hon. Charles Stewart, Minister of Interior. Another order-in-council provided the payment by the government of one-eighth of a cent per ton on all shipments into Manitoba of coal mined in Alberta or in the Crow's Nest Pass district of British Columbia.

The special rates are put into effect from June 1, 1930, to May 31, 1931. They are to apply to all coal used for industrial purposes, but not when the coal is for use on railway locomotives or for domestic fuel.

The order-in-council respecting Alberta and British Columbia coal supersedes another order-in-council passed a week ago which provided assistance of one-fifth of a cent per ton per mile for coal from the Crow's Nest Pass area and the bituminous areas of Alberta. The new order extends the favored area to the whole province of Alberta and the rate is altered to one-eighth of a cent.

Officials of the Dominion Fuel Board explained that the 50 cents per ton to be paid by the government is expected to remove the advantage enjoyed by United States mines over those in Saskatchewan in the way of freight rates. Coal from over the border could be carried to the Manitoba border cheaply, it was stated, on account of the water route between Lake Erie and the head of the lakes.

In the same way the assistance being given to British Columbia and Alberta coal is expected to remove obstacles to its use in Manitoba.

Plans May Be Changed

R-101 Likely To Make Trip To Canada Instead Of R-100

Ottawa, Ont.—Cables from London, England, intimating that the trip from Britain to Canada would be made by the dirigible R-101 instead of by the R-100 as was previously planned, has not been officially confirmed by the Department of National Defence which has the Canadian end of the arrangement of the trip in hand. However, local air circles would not be surprised if the switch from one of the big ships to the other were made. Unofficial reports arriving here from England recently have rather favored the R-101.

Convention Date Changed

Canadian Good Roads Association Meets In Quebec In September

Montreal, Quebec.—Dates of the annual convention of the Canadian Good Roads Association, to be held in Quebec, have been changed to September 16, 17 and 18. In announcing the change, George A. McNamee, secretary of the association, stated that the Province of Quebec, through Hon. J. E. Perrault, K.C., Minister of Highways, is anxious that the visiting delegates should see the picturesque Gaspe Peninsula, in all the glory of its fall coloring, by the new highway.

Storms Damage French Crops

Cattle Killed By Lightning And Small Animals Drowned

Paris, France.—Storms which raged for several days over widely scattered parts of France severed highways and railroad communications, wrecked homes and damaged crops.

Lightning killed cattle, and flood waters drowned smaller animals in the Burgundy and Auvergne regions and north of Paris. Crop damage is reported to be heavy.

Succeeds Late Dean Rutherford

Saskatoon, Sask.—Professor A. M. Shaw, head of the Animal Husbandry Department at the University of Saskatchewan, has been appointed dean of the College of Agriculture in succession to Dean W. J. Rutherford, who died three weeks ago, it has been announced by Dr. W. C. Murray, president of the university.

ASCENDS THRONE

Latest picture of Prince Carol of Roumania, who has ascended the throne of Roumania.

Storm Creates Panic At Ascot Race Meet

Well Known Bookmaker Killed By Bolt Of Lightning

Ascot, Eng.—Panic swept through the throngs of Ascot race meeting when a sudden, terrific electrical storm broke over the enclosures and a bolt of lightning struck and killed Walter Holbein, well-known north of England bookmaker, in Tattersall's betting ring only a few yards away from the King and Queen and their royal guests.

Society women, caught in a rush for shelter when a deluge descended upon the throng, were thrown to the muddy ground and trampled under feet.

Hats were knocked off, parasols were lost and some of the women arrived at the stands without their slippers, which had been left behind, stuck in the mud or torn from their feet.

The King and Queen, accompanied by the Prince of Wales and escorted by many of their guests at Windsor Castle, had arrived in motor cars and were in the royal box when the storm occurred.

Effect Of Crisis In U.S.

Communist Papers Refer To Economic Conditions In America

Moscow, Russia.—Communist newspapers declared that the United States was paving one of the worst economic crises in its history.

Pravda, one of the organs of the Communist party, said the latest Wall Street slump was merely a prelude to a more destructive and dangerous drop.

"America's general industrial crisis," said the newspaper, "has been followed by an agricultural crisis of unprecedented depth and acuteness which sharply decreases the purchasing power of the farmers. The danger of a new war among the imperialistic countries, and especially against the Soviet Union, assumes a greater reality than ever."

Enter Red-Hot Fire Box

A remarkable example of bravery and quick thinking has been rewarded recently in the citation of Engineer H. J. Storey, Brookmere, B.C. (left), and Fireman A. Fulkerson, Penticton, for 10 merit marks, Canadian Pacific Railway recognition of conspicuous merit.

These two men while driving engine No. 570 at Hope, B.C., found grates dislodged from the grate carrier. Though the engine was under a full head of steam, they dumped the fire and taking turns in the task entered the red-hot fire box and worked until they replaced the grates and connected up all operating rods. Only a few inches from the scorching sides of the firebox, they found the heat intense and one man would replace the other after a minute's work. They brought their train to destination only a few minutes behind scheduled time, saving a serious delay.

REACTION TO THE NEW TARIFF LAW PASSED BY U. S.

Ottawa, Ont.—The signing of the new Hawley-Smoot tariff bill by President Hoover, in Washington, automatically brings into effect some twelve changes in the Canadian tariff as against United States. These are the items containing provisions for countervailing duties brought into effect in the Dominion budget of May 1 last. Some twenty items in the Canadian tariff contain the countervailing provisions, comprising 16 commodities. All of these are not further changed by the new U.S. bill as in some cases the new U.S. rate is the same as under the Fordney tariff.

The principle of the countervailing duties is that the Canadian tariff will be as high on the particular article coming from another country as the rate that country levies against the same commodity entering from Canada. While the countervailing tariff in this country does not specify United States, the interchange of the same kind of goods between Canada and that country is much greater than between Canada and any other nation.

One of the most important changes with the bringing into effect of the Hawley-Smoot tariff and the consequent applications of the countervailing tariff by Canada, will be its effect on potatoes. Canada shipped to the United States for the fiscal year ended March 31 last, potatoes to the value of \$1,173,179. Potatoes went to United States from Canada under a tariff of 50c. per cwt. last year, and U.S. potatoes came into Canada free. Under the new tariffs the barrier both ways will be 75 cents per hundred pounds.

Oats, cattle, meats, eggs and butter are also greatly affected by the new tariff wall.

A new tariff law was put into effect by the United States recently and international reaction to it was reflected in actual retaliation in kind by one government, consideration by two others of measures of reprisal and condemnation from the press of several nations.

Automatically with the effectiveness of the 1,122 rates schedules contained in the Hawley-Smoot tariff bill, Canada's countervailing duties became operative, placing higher duties on a dozen commodities imported from the United States.

These duties, which were included in that government's May 1 budget, are applied on the principle that the Canadian tariff shall be as high on certain articles coming from other countries as the rates those countries levy against the same commodities from Canada.

The Belgian cabinet discussed the new law and then decided that any retaliatory measures should await conferences with other European countries; the Spanish government studied requests that it break the existing modus vivendi with the United States as a protest.

In Havana, the newspaper El Mundo, attacking the new tariff law as unjust, says it will destroy the friendship between Cuba and the United States.

The Paris Petit Bleu advocates boycotting of United States products in France.

If Teheran, of Rome, said the tariff is the ultimate manifestation of the economic imperialism of the United States."

Was Prominent Grain Man

Montreal, Que.—A. P. Stuart, president of the British Empire Grain Company, and a member of the Montreal Corn Exchange, died here recently, aged 80. Mr. Stuart was born in Plymouth, England, and came to Canada in 1870, to become a private banker in Deloraine, Manitoba. Later he entered the grain business in Winnipeg, moving eventually to New York, London, England, and finally to Montreal. He is survived by his widow, one son and three daughters.

Saskatchewan Highways

Saskatoon, Sask.—Before the snow flies again, the provincial highways department expects to have completed and in full use, gravel roadways from Lloydminster via Saskatoon to Yorkton, and from Moose Jaw, via this city, to Prince Albert National Park.

FOR THE VILLAGE AND
MUNICIPAL COUNCILS

Glancing through a report of a coun-
cil meeting in one of our exchanges
we find that the local printer does
not seem to be favored with the work
of the town the same as it should.

The accounts passed for payment at
this particular meeting of the council
show that the local printer received
the sum of \$5.25 for printing, while
the Western Municipal News received

the sum of \$43.70 for printing for the
town. Just why the local printer was
not favored with the work is not
known, but it was not because he
was incapable of doing the work and
his prices would compare favorably
with those of an outside printing con-
cern, especially when it is taken into
consideration the good the printer and
his newspaper are doing for the up-
building of the community; this work
cannot be counted in dollars and cents.
The local newspaper has to pay its
taxes and in return it expects to get
the printing of the Village or town to
offset this and keep him in business.
This is a grave mistake that most of
the towns and villages have made, and
which many of them have remedied
in the last few years. The Western
Municipal news is all right to patro-
nize where there is no printer in the
town or vicinity, but where there is

a printer there is no excuse. This
also applies to the Municipalities and
their Reeve, Councillors and secretary
should make it a point to have all
their work done in the local printing
establishment. There has been talk
among the various public officials that
the local printer cannot do the work.
This may have been the case a few
years ago, but where this existed the
printing and newspaper office has been
forced out of business or has had to
put in equipment to handle all the
work in order to keep his head above
water. The local printing offices can
do the work and do it well.

Speaking of printing offices and the
Chronicle office in particular, we truth-
fully say without fear of contradic-
tion that if a survey of the printing
offices of the City of Calgary was
made that it would be found that only
about 20 per cent of them are better
equipped to handle job printing than
is The Carbon Chronicle.

The Village of Carbon and the Mu-
nicipal District of Carbon are exam-
ples where the outside printing house
gets some of the work, but we are

pleased to say that the Village of
Carbon has seen fit to let the local
printer have first choice on all printed
matter required and so far the Carbon
printing office has not turned down
any work, and all work that has been
done seems to be very satisfactory.

Remember! When the next print-
ing salesman walks into your office
and asks you for a printing order, tell
him there is a printer in town—and
that he CAN do that particular job.

HAVE YOU PAID YOUR SUBS-
RIPTION YET? NOW IS THE TIME

During the course of the forth-
coming World Power Conference
to be held in Berlin, Germany,
June 26, C. Lefebvre, delegate for
Canada, will propose that the next
convention shall be held in Can-
ada in view of the rapid strides
made in matters electrical by the
Dominion. Mr. Lefebvre sailed for
Europe recently on board S.S. Em-
peror of France.

June 2 saw the furnishings of
the new central tower extension
of the Royal York Hotel, Toronto,
completed. Altogether there are
152 guest rooms in this wing, in-
cluding six period suites, art mod-
erne, flower, Dutch and Tudor.
The Royal York is the largest hotel
in the British Empire and with this
addition numbers 1,156 rooms.

Fenwick Saunders, riding his bi-
cycle at Tusket, N.S., recently,
saw a salmon sporting itself in
shallow water near Tusket Dam.
He crept cautiously up, grabbed
the fish which almost escaped,
dragging him into deep water, but
although out of his depth, suc-
ceeded finally in getting a 10-
pounder fish safely ashore.

Radio continues to advance in
popular favor in Canada. At the
end of March, 1930, there were
423,557 radio receiving licenses is-
sued by the Canadian Government
radio branch of the Department of
Marine, compared with 296,926 on
March 31, 1929, an increase of 126,-
631 in the 12 months.

The number of motor vehicles
registered in Canada during 1929
was 1,192,889, an increase over the
1928 registration of 117,070 or 10.3
per cent. This was an average of
one motor vehicle to each 8.2 per-
sons. Canada ranks third among
the countries of the world in the
number of automobiles in propor-
tion to the population.

With a view to providing proper encouragement for the very important work being done by Boys' and Girls' Calf Clubs to improve the dairy cattle industry in the province of Quebec, the Canadian Pacific Railway is offering a scholarship to minors of 16 years and over, exhibiting in the Boys' and Girls' Calf Club classes at Canada's Great Eastern Exhibition, Sherbrooke, Que., August 25-30 next.

The 1936 International Railway Congress may be held in Canada, with Japan as a possible alternative location, according to information brought back from the 1930 gathering in Madrid, Spain, by D. C. Coleman, vice-president of the Canadian Pacific Railway, and Sir George McLaren Brown, European General Manager, who together represented the railway at the recent world meet. Every country in the world, except Russia, was represented.

Launched on June 11, at Clydenebank by H. R. H. the Prince of Wales in the presence of a distinguished gathering of notables, S.S. Empress of Britain, ace of Canada's steamships, took the water and pictures of the function were flashed across the Atlantic and the speeches radioed and appeared in New York papers. Coupled with the Prince's speech were speeches by Lord Aberconway and E. W. Beatty, chairman and president of the Canadian Pacific Railway.

Canada's largest convention held in Canada's largest hotel came to a successful termination last week when the Ancient Arabic Order of the Nobles of the Mystic Shrine, coming from dozens of cities in Canada and the United States, who had invaded Toronto to the number of close on 100,000, left for their respective homes. The Royal York could not of course fully accommodate them and the Canadian Pacific Railway built "Fez City" of railway coaches for the purpose near the hotel.

Meat and dairy products are increasing in popularity on the daily menu of the people of Canada. The per capita consumption of meat is eight per cent greater than in 1920 and the total quantity of meat consumed annually in the Dominion has increased 20 per cent in the last 10 years.

Ontario tops the list of Canadian provinces with fatalities at level crossings during the past three years, according to Arthur Gaboury, secretary-general of the Province of Quebec Safety League. His figures show 71 deaths in 1928; 78 in 1929 and 16 to the end of May, 1930. These compare with 39, 7 and 7 for Quebec in the same periods. The greatly reduced numbers in the case of Quebec are attributable, says Mr. Gaboury, to the observance of the law in that province calling upon cars to stop when reaching a crossing, whether a train is in sight or not.

Bright Atlantic silver sea-run salmon are entering New Brunswick angling waters in greater numbers than ever this year, according to reports from wardens reaching the provincial department of Lands and Mines. On the Restigouche River catches of 28-lb and 25-lb. salmon have been made.

Gum-Dipped Cords Stand the Acid Test

Even though Firestone cords are of superior strength and elasticity before they are built into Firestone Tires, they go through the Gum-Dipping process for added strength and endurance.

Gum-Dipping—exclusive to Firestone Tires—saturates and insulates every fibre of every cord in the tire. This prevents the cords from chafing against each other and eliminates internal friction and heat—the greatest enemy to tire life.

Thus Firestone Gum-Dipped Tires have double reasons for their toughness, ruggedness and unequalled mileage—by actual test they hold all world's records for mileage and endurance! Specify Firestone Gum-Dipped Tires on your car. See your nearest Firestone Dealer today.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

WORLD HAPPENINGS BRIEFLY TOLD

Death has removed one of Britain's famous sportsmen, the Earl of Selkirk, owner of the Grand National race course at Aintree. He was 59 years old.

Authoritative private advice to the United Press from Moscow, said all the Soviet's spring wheat sowed up to June 10, amounted to 22,176,000 hectares (about 55,550,000 acres).

E. W. Beatty, president of the C.P.R., said his company had a site in mind for their projected London hotel, England, but not the Hotel Cecil as had been rumored.

The sudden overflowing of the Lena River in this eastern section of Siberia has swept away 346 homes and 20 other buildings. Many cattle were drowned and other damage was heavy.

Dieudonne Coste, famed French flyer, has been awarded the medal of the International Aeronautic Federation for the most noteworthy achievements of the year in aviation.

Searching among the drawers of an old sideboard, William Bonnell, of Montrose, Colorado, found an old newspaper giving an account of the death and burial of George Washington.

About the time when airplanes will be landing on every apartment house roof or in the commuter's back yard, science will have aided in perfecting an automobile that won't wear out. One British firm has perfected a steel so hard it cannot be scratched with the sharpest file.

Plans are being discussed at Windsor, by the Border Chamber of Commerce, for a good will business and pleasure trip through western Canada, possibly late in August or early in September. It is expected that the tour will be open to other than chamber members.

Persian Balm is the one true family aid for skin health and beauty. Aids the mother in additional loveliness. Protects the tender skin of the child. Delights the father as a hair fixative or cooling shaving lotion. No matter what use it is put, it is always beneficial to the skin. Every woman should use it. Persian Balm cools and caresses the skin and creates complexions of surpassing loveliness.

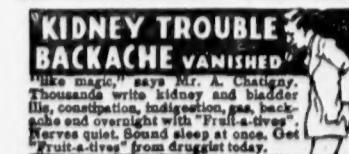

Farmers In Public Life

The Farmer's Advocate says: "Farmers are getting a grip on things politically. Honourable Walter Lea, a farmer in Prince Edward Island, is now Premier of his Province; Honourable John Bracken, a trained agriculturist, is Premier of Manitoba, and his Honour J. D. McGregor, a noted breeder of Aberdeen-Angus cattle, is Lieutenant-Governor of the same Province."

Use Minard's for Rheumatism.

A Long Felt Want

"Men who desire such dilutions," says the Rev. C. E. Macartney, D.D., "can drink decaffeinated coffee and smoke denicotinized tobacco, and now we have on every hand dechristianized Christianity." But up to the hour of going to press, there seemed to be no hope for dejazzed jazz deelectionized elections, and deweatherized weather. Nor even for detaxed taxes.

W. N. U. 1843

Manitoba Jubilee Impressions

Celebrations In July To Mark the Sixtieth Anniversary Of Manitoba's Admission Into Confederation (By Old Timer)

Men who have lived in Manitoba since the early days, and especially those who were born here, love to recall the various fights or squabbles in which the Province was involved during the first half-century of its corporate existence. Most of the questions raised in the stormy days found their origin in the well-known constitutional fog which seems to have always surrounded the relationship of a Province, particularly a new one, to the Federal authority. The learned Solons who drew up the British North America Act, as well as the more or less wise ones who carved it up before it became law, failed to take into account many of the big problems that have developed since. For that reason they were unable to lay down in plain words the points of distinction between the respective jurisdictions. Many and varied were the legal and political battles that ensued. The present differences are so mild that by comparison it might almost be said that negotiations are now conducted in silence.

When the Canadian Confederation was established in 1867, four diverse units of British territory in the north-eastern section of the continent agreed to come together and forget, as far as possible, their differences. Since they all retained their provincial status, however, with the necessary, and also some unnecessary, governmental machinery in each case, there was still plenty of room for argument. If the Fathers of Confederation (who rightly received so many tributes during the Jubilee celebration three years ago), could not adjust the situation between the Federal jurisdiction and that of the four units which had been established for generations, how could they be expected to foresee and care for problems relating to a new territory subsequently taken into the union? It simply wasn't done, for the reason that it couldn't be done.

The Diamond Jubilee celebrations through the Province on July 15 next, are intended chiefly to mark the sixtieth anniversary of the admission of Manitoba into Confederation, and there is no doubt they will in every case be worthy of the occasion. When the event actually took place in 1870, there was much shaking of heads, particularly in the East, about the wisdom of the step. A review of the litigation and other trouble that has followed would seem to justify some of the doubts, and it is a matter for congratulation now that these have been dispelled. Manitoba was the first of the new territories to be absorbed, and her problems were without precedent, insofar as her relations with the "rest of the family" were concerned. It is little wonder, then, that when trouble did arise there was plenty of it. This Province was variously regarded as the "martyr," the "stormy petrel" or the "ugly duckling," according to the particular viewpoint of the politician who was expressing an opinion on the subject. Whatever the occasion, Manitoba was prominently in the limelight. Whether it was in the matter of railway competition, enlargement and adjustment of boundaries, educational autonomy, insufficient subsidies, or control of certain phases of commercial affairs, there was at no time any doubt about Manitoba's position. If there was a fight, she was supposed to be in it, like the mythical Irishman. What is more, she not only desired to be in it, but she had her wish gratified to the full.

From the standpoint of material advancement, the most important battle was that in connection with the boundaries. When the Province was instituted in 1870, it was a tiny affair, and was facetiously likened to a "postage-stamp." After a little more than ten years of discussions the Government headed by Sir John MacDonald at Ottawa, arranged to have the boundaries greatly extended. Indeed, under the proposed scheme a large section of what is now Western Ontario, including the town of Rat Portage (Kenora), would have come under the jurisdiction of Manitoba. But the Ontario Government, under the leadership of Hon. Oliver Mowat, saw a fine chance to raise a commotion, and it was duly raised. When the smoke and haze of legal action had cleared, it was found that the Mowat Government had won

SUNDAY SCHOOL LESSON

JUNE 29

ATTEMPTS AT APPRAISING CHRIST

Goldent Text: "Thou art the Christ, the Son of the living God."—Matthew 16:16.

Devotional Reading: Isaiah 2:2-4.

Explanations and Comments

In the triumphal procession of the Roman conqueror, kings and princes walked as captives in the emperor's train. Thus all the greatest men of the past generation seem to have joined Christ's triumphal procession. Let us call the roll of the great. Among Carlyle's last words were these: "The most important event ever transacted in this world is the life and death of the Divine Man in Judea, at once the symptom and cause of innumerable changes to all people in the world." By acclamation John Ruskin will be voted the first place among the English prose writers of the last two centuries. But Ruskin says his life "has been dedicated not to the study of the beautiful in face and flower, in landscape and gallery, but to an interpretation of the truth and beauty of Jesus Christ." Another modern humanist is Matthew Arnold. But dying, Matthew Arnold said: "Christ came to reveal what righteousness really is. For nothing will do, except righteousness; and no other conception of righteousness will do, except Christ's conception of it. His method and secret." James Martineau asserts that Christ must be called "the regenerator of the human race. The world has changed and that change is historically traceable to Christ." We all know that Shakespeare, perhaps the greatest intellect ever known in its wide and many-sided splendor, paid the lowliest reverence to Christ in passage after passage. All the great poets of our age, Lowell and Longfellow, Browning and Tennyson, unite in saying,—

"Thou seemest human and divine; The highest, holiest manhood thou; Our wills are ours, we know not why;

Our wills are ours to make them Thine."

—Newell Dwight Hillis, in "The Influence of Christ in Modern Life."

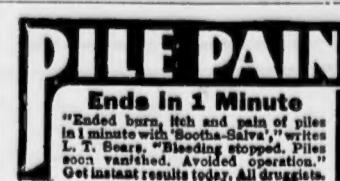

Is Easily Mastered

The art of swimming is so agreeable and so easily mastered and the places where it is taught by competent teachers are now so numerous in our cities that even urbanites ought not to grow to maturity without being able to do what any poor fish can. Country youth generally finds a "swimmin' ole" and teaches itself.

The owner of a popular brand of car was having trouble in starting his engine.

After watching for ten minutes the man wrestle with the starting handle a little boy asked his father:

"How far will it go after he has finished winding it?"

Motor Fuel In Western Canada

Unlimited Quantities Can Be Commercially Produced In Northern Alberta

Gasoline in almost unlimited quantities can be commercially produced from oil sands in Northern Alberta, according to Dr. E. H. Boomer, of the University of Alberta, addressing the National Research Council. A new method which yields light oils suitable for the production of gasoline is credited to Dr. Boomer and Dr. A. K. Clark, also of the University of Alberta; and a semi-commercial plant, now in operation, shows, it is said, that Western Canada, at least, will shortly be independent in the production of motor fuel.

Chinese Children Starve

More than 200,000 children have died of famine in Northern China since January, according to Commissioner MacKenzie, of the Salvation Army. The Commissioner, who recently returned to Australia from China, said that 80,000 Chinese wives and daughters had been sold for \$2 or \$3 each to provide food for the remainder of their families.

The female mosquito is not only the one that stings but the one that sings.

The ordinary person's lungs contain 76,000,000 air cells.

CHAPTER XVII.—Continued.

"You on a vacation?" questioned Grandma with a smile.

"Not so's you'd notice it," replied Jim, taking what Grandma called "the visitor's chair," and throwing his hat onto the table. "I've been to Eastboro on business, and as George K. Doesn't expect me back till after lunch, I thought I'd pass the time of day with you. How's everything?"

You mean Charmian?" queried Grandma astutely.

"You'd have make a first rate detective, Grandma," was Jim's retort; and the old lady laughed.

"Well," she responded, "the last I saw of 'everything' was when she left for school. The doctor offered to take her in his car, but she said she wanted to walk so I suspicioned she had something on her mind."

"What?" asked Jim, and added with caution, "Something to do with school?"

"My idea was," answered the old lady, "that it was something to do with you, Jim."

"Me!"

"Yes," said Grandma. "Maybe I'm all wrong, sonny, but I thought she was feeling sort of hurt that you never told her, when you were riding yesterday, that you and your mother were going to California."

"I meant to," explained Jim, "but my mind got taken up with other things. Then, too, I didn't know that Uncle George was going to blab so soon. Not that I care, because Mother's going to tell Lizzie Baker this morning and ask her to do some sewing for her before we start. Besides, I knew it didn't make much difference to Charmian whether I was in California or Timbuctoo."

"I donno why you should say that, Jimmy. You haven't got a better friend in town than my girl is—unless it's me."

Jim's young eyes looked suddenly weary, and his mouth grim.

"It's something more than friendship that I want from Charmian, Grandma. No use pretending, is it—to you anyway? And it's plain to see that she's giving the thing I want to some one else. Why should she care whether I go West or not?"

Grandma looked out of the window for a moment, but seeing nothing to comment upon, turned back to Jim.

"I presume you mean she's falling in love with Doctor Carter?"

Jim nodded.

"I donno as I like you saying that,

was dying, Jim. He knew better than any one else knew, how your mother was going to miss him; and all he wanted was that you should help her over the hard sledding, not that you should bury yourself in the drifts for her sake. I'm an old woman, Jimmy. My time's not far away, and I know how folks feel about such things. You see, you've been obeying the letter of that promise, not its spirit, which your father meant you to obey."

"You believe that — honestly, Grandma?"

"Implicity, son," said Grandma Davis.

Jim arose and patted her shoulder clumsily.

"You've helped me a lot," he said.

"It would be a pity if I couldn't, with seventy-eight years behind me!" she answered, smiling up at him. "And don't worry about Charmian's misunderstanding you. I'll make her see."

"But not till we've gone, please," said Jim, reaching for his hat.

"That's for you to say, Jim. When are you going?"

"Within a fortnight. The doctor wants Mother to get away before cold weather. It'll be some change from Wickfield, Grandma!"

"I'll do you good. Maybe you'll meet some o' those movie vampires and fall before 'em."

Jim laughed. It was what Grandma wanted and was working for; but she added wistfully as he reached the door: "I'm going to miss you, Jimmy."

"And believe me, I'm going to miss you!" he responded warmly as he turned away.

CHAPTER XVIII.

The Bennetts had been gone a month. Their big house facing the common, which had been Sarah Bennett's pride for thirty years, was closed for the first time in its existence, the shining plate glass windows boarded over because, Jim told his mother, boys are the same from one generation to another, and a window-pane in an empty house is a source of irresistible temptation. Coming from the library one Saturday afternoon, Charmian paused to look up at its grim coldness, thinking that the house seemed hardly more forbidding now than in the days when the front shades were relentlessly pulled down to keep a ray of sun from penetrating the gloom within, and, possibly, fading the precious parlor carpet that had come from Boston when Sarah was a bride.

Only the iron dogs that guarded the big front door looked different. They seemed, thought the girl whimsically, forlorn, and patiently unhappy, with drifts of snow on their icy backs and between their ears, Jim, she remembered, had always kept them brushed clean of snow. They had been his playmates, and Charmian's. Towser and Mouser, they called them. How many miles, she wondered, had she and Jimmy ridden those iron steeds.

She was moving on but at a sudden impulse turned about, and going up the path to the patient canines, brushed off the light snow with a mitten hand. Then, glancing stealthily around and seeing no one, she reached out hastily and gave them each a pat. Jim had once told her in a burst of half-shamed confidence, that he patted them every morning when he went to work! Together they had laughed at the idea; but Charmian did not laugh now. Indeed, it seemed to her as she regained the sidewalk and glanced back at them, that the dogs looked more cheerful. She could, indeed, almost hear the thump of two hard, metallic tails!

"Well!" breathed Grandma. It was an exclamation of surprise. She sank back a little in her chair, regarding the young man's sober face with newborn understanding. Then she said: "And you promised, Jim?"

Jim nodded, and went on: "I've thought, since I got old enough to think it out, that perhaps he didn't mean me to take it so—so literally. Or he may not have realized how Mother would get to—well, depend upon me. He wouldn't have wanted me to make a promise that would spoil my life; and there've been times, Grandma, when I've felt as if it had. But don't you ever tell that—even to Charmian!" he added loyally. "He was a good man—my father."

"One of the best," responded Grandma. "One of the finest. I'm sure that he never meant you to take that promise the way you have. He

"Going my way?"

Charmian turned, startled. The old doctor's shabby car had drawn up beside her, and he was leaning forward, an invitation in his kindly eyes.

"I was going home," she answered, "loaded with Sunday reading matter, you see; but if you don't be gone too long I'd adore a ride."

The old man beamed with pleasure.

"And I'd 'adore' your company, my dear. Reach in behind for my old cape, and wrap it 'round you. There are colds enough this time of year without adding to the number, and that coat of yours is none too warm a day like this."

"You're right," said the girl, dragging the worn old cape from the back seat, and snuggling into it. "I'm planning to go to Portland after Christmas and indulge in a new one, provided I can find a bargain. It's pretty cold on those early morning walks of mine, though John has been a trump about taking me in his car on the worst days."

To Be Continued.

BACKWARD BABIES

Thrive After Use Of Baby's Own Tablets

Derangements of the digestive organs are responsible for most of the ailments which afflict young children and keep them backward in development. Baby's Own Tablets regulate the stomach and bowels restoring them to normal action and this is all that is necessary to set the little sufferer safely on the road to health and happiness.

Baby's Own Tablets are specially designed to correct indigestion, constipation, colic; break up colds and simple fevers and to allay teething pains. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Girl Chooses Novel Engagement Gift

Every Blind Person In Her Home County Will Receive Radio Set

A man who recently became engaged to a Gloucestershire girl asked her to choose something as an engagement gift. The result of her choice is that every blind person in the county who is without a wireless set will be given one. The total cost will amount to about \$50,000. The gift includes the cost of maintaining the sets. The donor does not desire the identity of his fiancee or himself to be revealed.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

An Extraordinary Experience

Wife Of English Peer Talked To Him From Mid-Atlantic

An extraordinary experience befell Lord Brecknock at the Aldwych Theatre, London, England. He was sitting cosily in the stalls with a small party, when a theatre attendant approached him and said "Mid-Atlantic wants you." Scarcely understanding what it was all about, he suffered himself to be led to the telephone and spoke to Lady Brecknock, who had called him from the "Majestic" with as much ease and lack of trouble as if he was making a local call. It is a proof of the efficiency of the telephone service that he was located at the theatre in question within four minutes of the call having been put in at his house in London.

Has Eye For Detail

Recent biographies of Queen Mary have failed to mention one of her most striking characteristics. She has the unusual gift of what is called "the photographic eye." She never forgets the arrangement of a room, and after a lapse of years will remember that the position of some article of furniture has been changed or that something has been removed.

The eastern two-thirds of New Guinea, the largest island in the world, is largely unexplored.

The word "villain" originally meant "villager."

Little Helps For This Week

"Thou shalt give unto the Lord thy God according as the Lord thy God hath blessed thee."—Deut. xvi. 10.

For the best that thou canst be Is the service asked of thee.

The Almighty, in His providence, does not ask of us uniform rents for our rights and lives, as earthly landlords sometimes do. He only asks for the rightful use of the talent entrusted to us. The taxes of Heaven are never per capita, but always pro rata. Not the form observance of each and all alike, but every heart's desire, every hand's readiest service. Not the number of acres you till, but the quality of your tilling determines the profit of the harvest in spiritual as well as material farming. This standard exacts no promises, but it accepts no apologies; for there is no occasion for apology when you have done all you can.—Jenkin Lloyd Jones.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

She (somewhat foggy on musical matters)—"Is Bach composing much now?"

He—"No, madam, he's decomposing."

Minard's for Falling Hair.

Leads In Export

"Canada exports more manufactured goods per head of population than any other country in the world," says the Farmer's Sun. "The figures are: Canada, \$64.80; Great Britain, \$55.80; Germany, \$32.68; France, \$30.58; and the United States \$25.13."

Weak After Operation

"I was very weak after an operation. My nerves were so bad I would sit down and cry and my husband would not go out and leave me alone. Now my nerves are much better, thanks to a booklet that was left under the door. Lydia E. Pinkham's Vegetable Compound surely put me on my feet. I have taken eight bottles. My friends tell me I look fine. My sister has taken this medicine too."—Mrs. Annie Walton, 67 Stanley St., Kingston, Ontario.

**"HOLT" COMBINE IN NOW
"CATERPILLAR"**

A change in the name of the Holt Combine to "Caterpillar" Combined Harvester, was announced by Union Tractor & Harvester Co. Ltd., dealers for "Caterpillar" Tractors and the newly-named "Caterpillar" Combined Harvester in Central and Southern Alberta.

The new name is given to the combine which has an 85-year working history back of it. In California, a new land of the '49 gold strike, was so weighed down by high prices for even the commonest articles that anything which suggested a cheaper method of producing the needed food supplies was eagerly tested. That is why California led in the development of harvesters from the imported Michigan machine of 1854 to the present day.

Stockton, California, became the center of the harvester industry. It is here that such features as link belt chains, the first side hill combine, the first friction clutch were introduced by Benjamin Holt. Daniel Best of San Leandro, California, perfected the use of the gasoline engine for powering harvesters. The features in the present "Caterpillar" Combine can be traced directly to this background.

The windrow system, offered the farming public three years ago for the first time, has also been perfected in the 1930 models until it is ready to make practically any small grain or seed crop anywhere "Combine-able".

SPADES AND PAILS

A traveller who has seen many countries and made a study of child welfare the world over was much impressed with a sight that may be seen daily in the city of Calgary in a beautiful garden, where were many children at play in happy grassy places under the shade of great fir trees. The older girls and boys were engaged in games that did not call for much movement, for one observed that their little limbs were chained in plaster casts, or limited with splints. On a rug lay a small baby with golden hair, who was evidently the pet of them all.

Across the walk was a huge pile of sand, and here were many spades and pails busily being filled and emptied in the time-honored custom of making sand pies. The shining sand gave the children a great deal of pleasure, they seemed to enjoy holding it in their little hands and watching the grains slowly trickle through their fingers.

The brilliant June sun shone on their bronzed bodies, for these little people were taking their daily sun bath, and the healing rays, which Alberta sunshine has to a great degree, were taking effect in a rosy redness that looked healthy and wholesome.

One realized that this happy form of cure is one which can be indulged in by all children, just as much as if they were like these little people of the Red Cross Children's Hospital in Calgary. All that is necessary is a back yard or garden, a sun suit which may be made from underwear or even a swimming suit. Mothers must remember that such treatment must be carefully understood so that the child is not burned too quickly or harm may result. Write to the Red Cross, 407 Civic Block, Edmonton for a book on Sun-treatment, free on request.

"TAKE HOME A BRICK"

his doorstep. His outdoor surroundings are as eloquent to him as his house. Any house, no matter how humble, which is surrounded by trees and shrubs and lawn, is inviting in its atmosphere and establishes at once a standard of pleasantness.

In remembering scenes of childhood, few people manage to recall the furnishings indoors, but everyone remembers the cherry tree by the back door, the long rows of spruce or popular, the best trees in the apple orchard. It is these which carry a permanent, happy memory—the gracious beauty of nature.

It is within the ability of everyone to surround his home with trees. Their quick response is a source of astonishment and gratification. In a very few years little saplings are shade trees, and furnish a gracious serenity to any home, infinitely in excess of the labor

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to your self and your local paper to back up these efforts by at least having your printed matter done locally.
